The results were reported to the Hudson City Council on October 06th with a copy sent to the State of Michigan Treasurer. An unqualified opinion on the City of Hudson's financial statements has been issued. ## Carbon Monoxide—The Silent Killer

The winter months are here. As the Mercury begins to dip, some families, struggling to pay their heating bills, will turn on the kitchen stove burners, the oven, space heaters and generators, in an effort to take the chill off of their home. Often called a silent killer, CO is an invisible, odorless, colorless gas created when fuels, such as gasoline, wood, coal, natural gas, propane, oil and methane, burn incompletely. The goal of the **Hudson Fire Department** is to reduce or eliminate the number of carbon monoxide incidents in the **Hudson Area** and discourage anyone from using the range, oven or other unsafe methods to heat their home. Install CO alarms inside your home to provide early warning of accumulating CO. Have your heating equipment inspected by a professional every year before cold weather sets in.
